

Hello Mindpeak Team,

I'm a Full-Stack Developer with strong experience in React, TypeScript, and building production-grade web applications. I've worked on complex UI systems, optimized rendering performance, and collaborated closely with product and backend teams to deliver scalable features.

I'm particularly interested in this role because it involves data-heavy interfaces and meaningful work in the medical AI field. I enjoy tackling technical challenges, improving UX, and taking ownership of features from concept to deployment.

I would be excited to contribute to Mindpeak's mission and work with your international engineering team.

Best regards,
Artyom Bordulanyuk
